The information below is the NBS Plus product entry for Triton Systems Triproof Cream - In-depth Façade Treatment.

Triproof Cream - In-depth Façade Treatment

Odourless water repellent treatment for masonry forming a water repellent barrier. It is formulated from a blend of silanes and siloxanes which line the pores of the masonry walls to form a water repellent matrix. Once applied, it allows the walls to breathe whilst protecting them from further damp penetration.

Features:

- Allows walls to breathe and dry out easily after periods of flooding.
- Does not affect the natural appearance of the wall.
- Easy to apply saving time.
- Improves thermal performance of walls.
- Long life expectancy; typically 20–30 years.
- Penetrates deep into masonry wall.
- Suitable for use on both new and existing walls.
- Suitable for use on brick, concrete and stone walls.
- UV-resistant.
